I am currently working as a lead (unofficial) developer in the Marvel project in Etiya. I am also one of the frontend core team member in the project. My tasks are to build application structures, decide on development standards, and review every pull request (code review) from my colleagues.

Also I am responsible for attending architectural meetings and mostly doing the complex UI integrations with backend services. Also worked with creating project UI-Kit (component design system) with Patternlab.

#### General:

- Javascript with latest ECMAScript
- Typescript

#### Front-end:

- Angular with NGXS or NGRX, RxJS
- SSR (Server Side Rendering) with Angular Universal
- Bootstrap, Sass, HTML5, CSS3
- Patternlab, Fractal with Twig Template Engine
- React with Redux (intermediate knowledge)
- Next.js (intermediate knowledge)
- Vue.js (entry knowledge)

#### Back-end:

- Express (entry knowledge)
- NestJS (entry knowledge)

#### Tools:

- Git
- Yarn
- Npm
- Webpack

## Professional Experience

### Frontend Developer

Etiya Bilgi Teknolojileri, İstanbul

Sep 2017 - Current

Marvel Project, Frontend Developer (<https://videotron.com/en>):

- Lead technical support of complex UX flows and development
- GTM (Google Tag Manager) implementation (based on state management with NGXS)

- Developing and maintaining atomic design component structure of multiple applications based on project UI-Kit
- Angular and CMS (Drupal) E2E integration with cross-domain state transfer.
- Working on two main frontend application which are web self-care and customer self representative. First one is for customers and second one is internal (behind a VPN) frontend application for customer representatives. Both are pushed to production successfully.

Fizz, Frontend Developer (<https://fizz.ca/>):

- App development from beginning to end with Angular 5-7, RxJS, NGRX, Typescript, Sass

Angular RxJS NGXS NGRX Patternlab Twig
